ION: o Wook!

The exparts from the part of Boston for the week anding Nov. 8, 1834, included 11,990 the hutter 99,004 the puece, 9,664 bla apples; the same week last you the port were 20,330 lbs, butter, 16,800 lbs. rese, 303 bbls apples. The value of ie exports of fruit, principally upples, for h (da, la \$20,211.

The ship, quits of apples to Logilsh ports an extraordinary inercita over prea out to about 288,000 barrels contained the exports amount to 121, on the pression an amount latte old that the largest average

eld of corn in this country during th ason of 1884, at ould be in thir stretch of referry which was set down upon t reset yield should be found on what the of according to the November retires the Department of Agriculture, which of the Definition of the Definition of the Definition of the Jude in Jude in Knissas and Nebraska at 35 bushels, while in Illinois, which was once considered the greateons. State. the yield was only 30 bushels, and to the yield was only 30 bushels. The worn out sail New England Is yet good for some-ing more than herely to hold the world gether.

It is safe to say that there are at least to where of thoroughbrell authoris in the pited States now, to where there was one eight or ten year ago. Thuse who are no closely watching local, changes to this direction would be actual-had could they make a comprehensive company on of 187 and 1884 in this particular. There is hard-by a neighborhood in which some improve-ment in the quality of breeding stock is going on; and he many places you can not travel many inflequithout passing a firm which does not contain samething in the line of well-bed stock. It may only be crob, or a bell, a few sheep or hogs! in start in poultry-but evidence present self everywhere that the needle use de rinland to test for themselves the matter of the value of blood in their demostle animals. In view of all this, breeders have greater encouragement than ever for pushing their business. The people treatment fole, and the flist indications of a return of trimed leave will that them investing his breeding annuals with a liberality while will come of the bellef that by doing so they will be taking a most important step in alvantaing that own, interests. In the light of popular feeling on the subject, it s not too much to expect that the proggreat as that of the past de a whoy partied its sulfit mole st E

Boston has en uplered, at jan or extensive arrangement tine ja oveko uabearably nalsastee lubarov lessly throwing away the cloud ats of fee ome scientific knowledge and engineering skill, be applied to the renovation of our soil, and theigrowing of food for the jed-ple. The greatest experiment in the utiliotion of this material which has yet been attempted in this country, is at the mapit-Lacturing town of Pullman, III, near Cidyears with great success, hoth as to the pulification of sewage, an after and quastity of croper and thanclaf return. It is on the find met. River, near Kensington, and the sewage from Pullman sources to the first manner as the first manner of the first manner of the file three. alles in length. The sewage I distillated brough surface dishie, and is entried off

The Chicago Trayene gives the erops for the present jeason, as 224,000 callinger, 6,400 bushels of pointnes, 3,500 hushels of onloss, 500 highels of turnips, 45 tohand onlosis, 500 linchels of turnips to tone of squash, and 18,650 decen building of celery, and says that full care of profunctional been shipped all over the United States to such places as Vicksburg, Miss., Pittsburg, Pd., New Orleans, Ld., All and Ga., Menophly, Tenn. In less than carlead lets, produce has been shipped as furnishes as the rest of the furnishes. Ends as Hartford, Conn., and Beston, Mass, and South as for as Galvestoh, Tev. Samplerand works have just been on a pleted, and it the low sprice of cabbage continues, a large quantity of the the article will be manufactured. A differ form, site field with Hotsteins, has been started. Unfinal all large, sown in out-1 averaged twenty-type dissects the aere this yele. Hay to the amount of 190 tone was cut. About forty over 190 box is continued. Hay to the amount of 100 ton was cut.

About forty one and boys in comployed.

Middlemen are no allowed tollands the produce. The crop of this year is in that of last year but prices are lower. The crop of 1883 gald 8 per year, on the loves from the last year but prices are lower. If he is a he ignored to this race, who makes two blades of grant to grow where only one had grown before, then the pridectors of the Pathe in farm, and those who have earlied out the experiment to account
